

### **FIS HAND HELD VIDEO MICROSCOPE FEATURES**

- Compact housing and probe
- Large 3.5 inch display
- Adjustable brightness, contrast and illumination
- Interchangeable adapter tips
- LED flashlight built into housing

### **FIS HAND HELD VIDEO MONITOR & MICROSCOPE PROBE**

The FIS video microscope has a large, bright 3.5" display in a compact and portable housing. Detect hard to find flaws with the variable coaxial illumination and adjust the video contrast and brightness for optimal viewing. The Probe features coated optics for bright, clear images. The ergonomic design is comfortable to operate and focuses precisely on the connector endface. Li-Ion power ensures long battery life for field use or can be used with the included AC charger. Specify one adapter of your choice when ordering.
